

of a world without the atom bomb. The shock of his removal from the world stage to the death of a more staggering blow to the imagination than the atom bomb.

Despite the worship accorded him by the Japanese, Hirohito usually wields little actual power. A more or less unswerving party to the marginalization of schemes of the military and the throne in 1932, and used its power to lead the Japanese people to disaster.

EMPEROR HIROHITO

Hirohito has been described as

Clark, Mrs. Elsie May. Clark, Mrs. Mary Elizabeth. Cooper, Baby Dora. Milton George.

Demchuk, Mr. Peter. Denton, Mr. Urvie Willard. Gaumnit, Mr. Clement. Glick, Mrs. Marie Louise. McGregor, Mr. James. McLay, Mrs. Ellen. Melnick, Mr. John.

London Hails Capitulation Of Japanese

By EDWARD A. ROBERTS
Executive to the Edmonton Bulletin

LONDON, Aug. 16 (AP)—London's millions hailed the capitulation of Japan today with the same enthusiasm that greeted the downfall of Nazi Germany three months ago.

Although the world's greatest city had little previous inkling that a surrender was imminent the news spread like wildfire and the streets were jammed with cheering and singing crowds while a constant blizzard of ticker tape and waste paper poured from the upper windows of office buildings.

On the ancient Colosseum, where Britons have hailed their victories for a thousand years, the snake-dances with Canadians, Australians, Americans with anyone in uniform.

ATTLEE CHEERED

In Whitehall, where Winston Churchill had his headquarters on historic May 7, crowds cheered his success. Prime Minister Clement Attlee as he arrived at Number 10 Downing street.

In Piccadilly Circus the honking of taxi horns and private cars marked the occasion, creating the biggest motor traffic jam since 1935 with all vehicles immobilized for blocks in all directions.

Flags of all the Allied nations—with British, American and Russian banners predominating, broke out throughout the city as the news spread. Even the weather cleared up—the first time that day.

GOOD-NATURED CROWD

Soldiers and office girls formed a majority of the early celebrators. Every military police force it and were helpless when a crowd of British officers in a car who was trying to get through Piccadilly Circus.

The officer could make no progress until he good-naturedly allowed the crowd's demand and gave three cheers for Britain, the United States and Russia.

At a Red Cross club, a soldier

broke the news, rushing in and waving a newspaper.

"Brooks, it's over," he yelled. "The boys are finished."

Soldiers rushed into the streets, shouting the good news, waving with Nazi salutes.

Top Italian Fascist Remains at Large

ROME, Aug. 16 (AP)—The rest of Europe appears to be moving rapidly to punish war criminals, but Italy accepts with extraordinary resignation the disappearance of the top Italian Fascist leader.

The only Italian Fascist leader of the top level brought to trial, Benito Mussolini, was executed by a firing squad in the north of Italy.

Months later, a vengeful Gen. Mario Roatta, former Italian army chief of staff and one-time head of the Fascist regime, was charged with collaborating with the Germans and executed.

Roatta's successor, Gen. Emilio De Bono, was charged with the course of his military career and executed.

High court of justice in Rome has charged collaborating with the Germans and executed.

Nagasaki Is Like Volcano 12 Hours After Atom Raid

By British Union Press
Executive to the Edmonton Bulletin

Twelve hours after the atomic bomb was dropped on Nagasaki, the city still looked like a volcano. The city was still in flames.

NBC correspondent Robert Shapley reported from Okinawa that the city was still in flames.

Shapley flew close to the city and saw the flames. The city was still in flames.

On our way up north, he reported, we passed within a few miles of what was left of Nagasaki.

We began seeing it a hundred miles away—first, as a thin white line in the black horizon.

I nudged the pilot and shouted over to him: "What do you think it is?"

He shrugged his shoulders and said: "I don't know. A moment later, the navigator came back on the radio and said: 'That's Nagasaki.'"

At the place they dropped orders of these magic eggs today.

I nudged the pilot and shouted over to him: "What do you think it is?"

He shrugged his shoulders and said: "I don't know. A moment later, the navigator came back on the radio and said: 'That's Nagasaki.'"

At the place they dropped orders of these magic eggs today.

Want Keep Hirohito Nippon Government Offers Surrender

Continued From Page One

A view to saving mankind from the calamities to be imposed upon them by further continuation of the war, the Japanese government asked several weeks ago the Soviet government, with which it had neutral relations then, to render good offices in restoring peace via-a-vis the enemy power.

Unforunately, these efforts in the line of peace mediation by the Japanese government, in conformity with the august wish of His Majesty to restore the general peace, and desiring to end the war, were interrupted by war as quickly as possible, has decided upon the following:

1.—The Japanese government was ready to accept the terms of the joint declaration which was issued at Potsdam in 1945 by the heads of the governments of the United States, Great Britain and China and later subscribed by the Soviet government, with the understanding that said declaration does not comprise any demand which prejudices the prerogatives of His Majesty as a sovereign ruler.

2.—The broadcast was either interrupted at this point or came to an abrupt end, as the announcer suddenly cut in with a request for the listeners to stand by and then went off the air.

It may be that the Japanese are awaiting the receipt of a copy of their offer by the Allies.

NAME ONE CONDITION

Observers point out that the Potsdam declaration was accepted unconditionally, as Japan has not made any demand which prejudices the prerogatives of His Majesty as a sovereign ruler.

Although the Potsdam declaration did not specifically include any immunity for the Emperor, it did not contain any demand which would make it impossible for him to remain in power.

In fact, the issue about the Emperor was not specifically defined.

Assuming, it is possible, that the Allied government may agree that at its acceptance of unconditional surrender by the Japanese, it allowed the Emperor to remain in power.

It is also possible that the Allied government may agree that at its acceptance of unconditional surrender by the Japanese, it allowed the Emperor to remain in power.

Ottawa Keeps Close Watch Jap Situation

Continued From Page One

to the Big Four—Britain, the United States, Russia and China—and that Canada would follow the lead of those major powers.

The surrender report touched off a series of moves in the Navy. A press conference was held in Ottawa which followed the German capitulation report last May 7.

On the military side, there arose speculation as to what would happen to the 30,000 troops destined to move shortly to the United States.

For many weeks, the military has been taking their places in the Pacific battleships.

ARMY ACTION UNLIKELY

There also are about 1,000 technicians and observers serving with Allied forces in the Far East. It seemed doubtful that any Canadian army men would serve in the security force but it also seemed quite possible that some might be included in any occupation police.

One speculation was that the Canadian Army might be called upon to cancel plans for the Canadian Army Pacific force, cancel the transport of the Pacific force, and to transport the Pacific force to the Pacific.

Other possibilities might be the freeing of additional transport for the Pacific force, and to transport the Pacific force to the Pacific.

Other possibilities might be the freeing of additional transport for the Pacific force, and to transport the Pacific force to the Pacific.

Pension Plan Will Increase Payments Here

Continued From Page One

to be at least double the number of pensioners in the province.

According to census figures, a further 18,000 persons could qualify as to age requirements if the limit is dropped to 48 years. Of this group, 18,000 persons are living who some 6,000 persons as "needing" the pension. This would bring the total number of pensioners in the province to approximately 20,000.

Present pension regulations call for 75 per cent of costs being borne by the province and ten per cent by the municipality. Seventy years is the qualifying age.

If the full plan is adopted by the Province, the pensioners would pay an estimated \$12,500,000 on pensions in Alberta, while Alberta would pay \$1,000,000 toward those needing a pension between the ages of 48 and 70.

PIPE FOR HER PERCH—Polly appears to be like a hot fox on the stem of her master's pipe on a cigarette transport in the Pacific. The master is Harry Katter, Chicago.

Workers Feared
Blown in Lake Okinawa Troops

By WILF DELIGHT
Executive to the Edmonton Bulletin

OKINAWA, 9:30 P.M. Aug. 16 (AP)—An American troop went wild on this island they conquered last week for war. To this end, access to the island is being made.

Police today were investigating her report that the saw what looked like four bodies flying through the air with debris and landing in Lake Superior behind the soldier.

Mrs. Massey said she happened to be looking in the direction of the elevator at the time and the blast threw her in the ground, but she was not hurt.

She said she got a clear view of the scene.

It Looks Like Peace

The Japanese radio announces that the Japanese emperor has accepted the Potsdam ultimatum for surrender except insofar as that ultimatum demands the disappearance of the emperor.
This capitulation is not unexpected. Only a suicidal fanatic would persist in the fight against such new forces as the atomic bomb and the entrance of the United States into the war. And while the Japanese leaders countenanced with great readiness the suicide of individuals, it has always been doubtful if they would do the same with equal celerity the suicide of the whole Japanese race. Indeed, racial suicide would violate the very essence of Japanese belief in Japanese destiny.
Nor does it come as a surprise that the Japanese should refuse to accept a demand for the elimination of the emperor. This mistake is the heart and centre of the Japanese political system and the Japanese religion. In their conception, the disappearance of the emperor would be exactly the same as the disappearance of Japan.
In their eyes, any surrender involving the removal of the emperor would also involve the removal of Japanese sovereignty and, indeed, the very right to make peace. The Japanese position, then, although it does not meet Allied conditions entirely, is still a logical position. It is the only unconditional surrender as the Japanese mentality is capable.
The offer of capitulation, in any event, is a great victory. It looks like peace.

Too Much Control?

One amendment to the city's building bylaws, to come before the council shortly, provides for absolute control by the city architect of all exterior and interior of dwellings. In effect, if a man wants to build a home the city architect must approve his designs for both the inside and the outside of the house.
Now it is admitted that a measure of control along these lines is essential if any semblance of town planning is to be preserved. And it is admitted that the cost test is not enough. A man may spend \$100,000 on a house in a residential area still erect such an architectural monstrosity that it will be a greater eyesore in the neighborhood than a \$500 shack.
But, granting that Edmonton's city architect is a man of almost boundless taste, who he doubtless is, this is far too much dictatorial power to give to a single man. With the best will and judgment in the world, he is bound to permit his personal likes and dislikes in architectural matters to govern his decisions.
The proposed amendment reads in part:
"Buildings intended for use as dwellings shall be so constructed and finished as to exterior appearance and interior in general with other dwellings already existing in the neighborhood."
One man control, coupled with this deadening directness, almost bound to damn all originality and imagination in home construction.
Everyone is familiar with cities where row upon row of colorless houses reared cheek by jowl in maddening monotony. This need not happen all at once in Edmonton. But the tendency would be in that direction.
The amendment is dangerous without some broadening. The control should be in the hands of a committee. The committee should be for conformity with good taste, not for conformity with what already exists.

A Gangster Voice

One comes back and back again with mounting indignation to the outrageous proposal of the New York Daily News, a product of the infamous Bertie McCormick, which urges that the United States immediately acquire all Canada's uranium and by force if necessary.
For years, Canadians have tolerated as a rather bad joke the rabid fulminations of the McCormick gang against all things British. They have watched the gradual poisoning of the minds of those who read the Chicago Tribune and the New York Daily News and have seen, as a product of this campaign of lying slander, the recent charges levelled against the British government that Canada has not pulled her share in the war, that she is actually eating her meat while white Americans, as a result of admitted administrative blunders, are going short.
McCormick and his vitriolic family have been the spearhead of the calumnious attack of which Canada is now the butt in the United States.
This attack has not concerned Canadian very much because we have known that the great neighborly heart of the United States was not finding expression in the machievous, mean and mendacious efforts of a few British fanatics.
But surely there is an end to the patience that is required of us. Surely this sort of enormity of insult is something more than polite and bored indifference.
The Daily News says:
"We now have the jump on the rest of

the world as regards manufacture and manipulation of atomic bombs and enough patriotic Americans can probably be found to see to it that Canada does the right thing by us and by itself with its uranium."

There speaks the gangster voice. There is an incitement to violence against an ally and a neighbor.
Is it not time the United States government took a hand in the anti-Canadian campaign which today is not only illogical, untruthful and malicious, but dangerously illegal as well?

The Ubiquitous Jeep

While imagination is torn and driven by contemplation of the new atomic era, it is almost refreshing to come back to a humbler instrument of warfare. For the ubiquitous jeep is in the news again.
An automobile company announces a new use for this vehicle in agricultural districts. It will be equipped with attachments for plowing, harvesting, taking the farmer and his family to church, running circular saws, electric light plants and all kinds of farm machinery.
An then from Paris comes still another purpose for the amazing bit of machinery. In one evening 312 jeeps were seized by provost officers who found everybody from generals to luminaries running about in them with charming blouses.

But most astonishing of all is an article in the London Daily Express which tells how a British aircraft company has succeeded in making jeeps fly. Fitted with a two-bladed rotor and temporary fuselage, tail, the jeep becomes a highly efficient flying kite.

Looking Backward

From The Bulletin Files

1895: 50 Years Ago

E. F. Hutchinson of Winnipeg is in town. Thomas Coghlan returned Monday from Fort Assiniboine.
Mr. White of the Edmonton Saddlery Co. returned from Regina on Monday.
George Kennedy of the H.R. Co. at Victoria, left for home Tuesday.
Messrs. McDonald and Murphy propose to take the machinery of their mining show to the Athabasca, where they will work it from a large number of people. The Edmonton Brass Band was in attendance and played lively and appropriate airs. The H.R. Co. also had a large number of people in costume, and played his bagpipes. Acting Mayor Strang welcomed the party.

Lord and Lady Aberdeen arrived Monday in the private car. A large number of people were at the station to meet the train. Inspector Snyder and a party of police were waiting with teams to convey the party across the river. They came by way of the lower ferry, and were met at the top of the hill by a large number of people. The Edmonton Brass Band was in attendance and played lively and appropriate airs. The H.R. Co. also had a large number of people in costume, and played his bagpipes. Acting Mayor Strang welcomed the party.
In addition, I was more than gratified to note the fine coverage given our program on Wednesday afternoon.
I would sincerely appreciate your conveying my thanks to Mr. Jack McElroy, Bulletin staff writer, for the excellent manner in which he handled our program on Wednesday afternoon. The reason given by the government for the change of policy (which formerly allowed 15,000 lbs. per axle where tire-carrying capacity permitted a load in excess of 15,000 lbs.) was that the road would not carry the additional 1,500 lbs. per axle.

1905: 40 Years Ago

The A. McDonald Company will build a warehouse at the corner of Third Street and Athabasca avenue.
Sgt. Butler of the R.N.W.M.P. arrived yesterday from Peace River.
The C.P.R. is purchasing options on the right-of-way to the end of the proposed high level bridge. Options on the Strathcona side were secured some time ago.
The peace conference is getting under way at Washington.
Gov. Strickland is in town from the Fort.
Father Dauphin came up yesterday from Hobbema.
W. C. Simmons left yesterday for Vegreville.
W. G. Goodness of Lethbridge is in the city.
Dr. Tilt and Bert Russell left today for Calgary.
The Methodist Sunday school picnic was held yesterday at the corner of 10th and 11th streets.
Robert Teagler has purchased two lots on McKenzie avenue, opposite the C.N. station axis.
The C.P.R. has a new train of passenger cars in the peace conference, it said to have full authority to end the war with Japan.

1915: 30 Years Ago

The 6th and 8th battalions are under orders to proceed to Sarajevo.
Washington—United States farmers are harvesting the greatest wheat crop ever grown in one country. The total is 1,440,000 bushels. The official estimate is 1,560,000 bushels.
Opening day at the Edmonton fair drew a crowd of 12,500.
London—War news today indicates the commencement of a new and greater effort for the Dardanelles.
London—After two weeks of heavy fighting British troops have taken the province of Gallipoli in the village of Hloope.
Ottawa—According to unofficial estimates made here, the 1915 wheat crop of the province is the largest sale of residents who have ever harvested. The present year's crop is 1,440,000 bushels. The official estimate is 1,560,000 bushels.
Ottawa—A resident of Russian soldiers is being mobilized at Kingston.

1925: 20 Years Ago

There having been no issue of The Bulletin between June 20 and Dec. 3, 1925, 20-year-ago items will be used for the following intervals.

1935: 10 Years Ago

Nanking—The government announced that more than 100,000 persons have lost their lives in floods in central China.
Ethiopia—It is unofficially reported that Ethiopia is negotiating with Japan for arms and ammunition.
The Citizens' Council committee will stage a drive for funds next month.
The C.E. Evans has retired as police magistrate of Edmonton.
Ottawa—Ontario relief trappers pitched camp in the north and the province's government is erecting lines led to them by Ottawa citizens.
Federal officials estimate that the rail has damaged \$100,000 in grain in Alberta this year.

Today's Text

See us, my dear, and you shall like—Amos 3:4
Most men employ the first part of life to make the other part miserable—L. Bruey.

SIDE GLANCES—'Maybe I was wrong about the movie, Junior! Here's a dollar—run along, and you can have a soda too!'

The Bulletin's Readers Say:

(These letters are from Edmonton Bulletin readers. The views expressed may differ from those of the Bulletin's own views. Brief letters are preferred. Letters are shortened if lack of space requires. You must give your name and address. Write only on one side of the paper. Letters and their contents become the property of the newspaper and cannot be returned.)

Air Force Thanks

Editor, Bulletin: On behalf of the Commanding General of the United States Army Air Forces Air Transport Command Alaska Division, I wish to take this opportunity to express our deep appreciation for the outstanding advance publicity which your newspaper gave us prior to the Open House at the Base commemorating Air Forces Day.
In addition, I was more than gratified to note the fine coverage given our program on Wednesday afternoon.
I would sincerely appreciate your conveying my thanks to Mr. Jack McElroy, Bulletin staff writer, for the excellent manner in which he handled our program on Wednesday afternoon. The reason given by the government for the change of policy (which formerly allowed 15,000 lbs. per axle where tire-carrying capacity permitted a load in excess of 15,000 lbs.) was that the road would not carry the additional 1,500 lbs. per axle.

Churchill's Future

Editor, Bulletin: We hear it said, in the highways and byways, "too bad about Churchill; after what he did, the people didn't back him."
In pre-war days when Churchill waged an unrelenting uphill struggle, in and out of parliament, endeavoring to awaken his people to the menace of war, and in the obvious dangers of Germany, I was unreservedly of his opinion. But in 1940, like him, I was in the place of the helm. I felt that the current of events had placed the right man in command. However, adverse the tempo, however ominous the clouds, he never lost sight of the shore. His resolve and courage were unshaken. He remained to the end of the empire. No one could be more in praise of such a man. The people backed him in a body.
When an election in Britain was called, I voted my ticket at Mr. Churchill's political residence. I would have wished to see him retire while at the zenith of his greatness. It was impossible that the British mind should remain static at a time when other nations, war-torn though they were, were marching toward sinister changes with giant strides. Poland, Hungary, Romania and other countries have witnessed armies sweeping to and fro over their peoples in a thousand and more years murdering, plundering, ravaging. Dynasties have risen and fallen. But the British people, the Kings have ascended thrones, some fell by the sword, others by bullets, but the British people have survived such cataclysms and looked on and on, as though rooted.

By EDGAR WOVNER
Make no mistake! British foreign policy under Labor management is going to change—not quickly, but fundamentally.
Only those who have forgotten what the Tory policy between the wars was can imagine the contrary. This policy was probably the most stupid in British history. It consisted of supporting Britain's enemies against Britain's own reliable friends.
British Tory policy—let us never forget—kept Mussolini in power and actually encouraged Hitler. It encouraged the monstrous Oriental potentates, built up Arab feudalists in the desert, and supported India's independence movement. It encouraged the Czechoslovakian, helped France overthrow the Spanish republic, supported France against the German republic, helped France overthrow the German republic, helped France overthrow the German republic.

Accordingly, it systematically hamstrung the French Republic and broke down the French system of European alliances. Thereby it weakened the European army upon which it had chiefly to lean for support when war came.
Hitler's 1938 attack was, in the eyes of the world, a direct result of the policy of the Tories. The Tories had learned nothing and forgotten nothing. How could they? by their minds were obstructed by a reactive conservatism—preservation of the status quo and economic system at home, of their anachronistic empire abroad, at almost any cost.
The policy even if localized to the British "sphere of influence," could not possibly be supported by the American people. It made almost no sense of co-operation between London and Washington, and it was a broad field for international embarrassment just when such co-operation was becoming more important.

The Labor Party landslide after the election of continental leadership, which will change many things. It has—if we Americans agree—opened a broad field for international co-operation between London and Washington, and it was a broad field for international embarrassment just when such co-operation was becoming more important.

Wedding Gifts That Will Please

Finch, Crystal, Lenses
Or Silver Will Delight Any Bride
By MARY ALICE QUAYNE
One chapter of the summer bride's story is told in the language of flowers but the more practical side is emphasized when she is shopping for a gift.
Although contemporary summer brides are living in furnished rooms or efficiency apartments, which have a distressing way of proving to be "deficiency" apartments, these brides are busily engaged in assembling their china, crystal, linens and silver in anticipation of the happy day when they can live in homes of their own.
Rather surprising they are choosing traditional and well-known patterns in china of the finest quality, even if they must do so piece by piece, rather than succumb to cheap novelty items with the transitory appeal of modernistic practicality.

Canadians Face Era of Reforms

Bruce Hutchison in the Christian Science Monitor
Canadians are amused when they see reports in the American press that on June 11 last Canada moved to the right and voted for the "status quo." The status quo perished long ago and will never return. Canada voted on June 11 to confirm the most drastic and daring social experiments of its history. This vote, the acceptance of radical policies, merely underlines the fact that Canada is developing a new kind of society that is not in the throes of a New Deal of its own Canadian sort.
The war saw the introduction of unemployment insurance; an income tax which virtually has put a ceiling on income and redistributed the whole national income in favor of the poor; the "cheap money" and low-interest rate governed by the government's central bank; creation of credit for export and import; farmers, and home owners; a floor under farm prices and finally state control of the national industry, the most generous system of children allowances, and finally, the state's intervention in the political mind to the national health insurance and general old age pension and the significant, the government's recent decision to provide a minimum wage. The state will provide a high level of employment by various means including large public investment.

Advantages Seen Canada's Ties With America Are Noted in Great Britain

By JOHN DAUPHINEE

LONDON, Aug. 10.—(CP)—Recognition of Canada's special position in the British Commonwealth as an American as well as British nation, with a more independent outlook than the other Dominions because of her close association with the United States, is reflected in new publications of the Royal Institute of International Affairs and the Royal Empire Society.

Study Proposals At Conference

OTTAWA, Aug. 10.—(CP)—Preliminary study of the proposals now before the Dominion-provincial conference got under way yesterday as six closed sub-conference meetings discussed financial arrangements, public investment, social security, agriculture, labor housing.

No announcement was made on the progress of the discussions, but there were indications that the preliminary phase of the conference will wind up today at a plenary session. Delegates will return home to study the Dominion proposals and prepare for the final phase of the conference.

The sub-conference meetings followed a morning session of the conference's coordinating committee which meets again today afternoon. The last plenary session is expected to finish this morning. A statement issued following the coordinating committee's three-hour meeting said time was devoted to discussing procedure and the best means of considering the proposals placed before the conference by the Dominion and several of the provinces.

LaGuardia Plans Musical Finale

NEW YORK, Aug. 10.—(AP)—Mayor LaGuardia plans a musical finale to his 12 years in office. Before under his arm, the mayor will have a small orchestra of 120 musicians, who will play a program of music that will last about an hour.

McCoy Health Service

This article is being written in answer to a request that I discuss the problem of noise. The original request comes from a person living in an apartment house in a crowded city, who complains that the noise of passing automobiles, are preventing sound sleep and promoting nerve strain.

It is true that human beings may be wakened by the sound of noise, but they can be trained to ignore it by listening to distracting noises. The effect upon the nervous system is apparently not serious in those who are naturally of a highly nervous nervous temperament.

Scientific experiments have determined that loud noises will cause fear in infants and hysteria in adults. The fear of noise is one of the two natural fears which we are born with. After we are born, we are born with a fear of noise, which we are born with. After we are born, we are born with a fear of noise, which we are born with.

Other experiments indicate that continuous noise causes mental fatigue. In the larger cities, noise is a distinct problem of the concentration of the industry. Especially in offices, where many are working together and where the racket of typewriters and telephones and their contribution to the noise problem is great.

A unit of measurement for noise is called a decibel and the noise in the average office is about 50 decibels. It has been found easy to feel the human ear is tired by the amount of noise present by reducing certain kinds of noise a little more than one-fourth. Deafness believes it has been reduced one-half.

Those who work all day in the midst of noise need peace and quiet at night. Taking this into consideration, it is a wise plan to try to live in a neighborhood which is relatively quiet, as far as the sound sleep necessary to build up the reserve of nervous energy will be secured.

Those of my readers who live in country districts will not find this article of much interest. But I strongly urge that those who live close to others, try to do their part in cutting down on needless noise by slowing down their cars when they are playing your radio, keep it turned low enough so that no one nearby can be annoyed.

When you are driving your car at night when others are sleeping, try to avoid unnecessary honking of the horn. Remember, needless noise is a great waste of the energy of the driver.

All questions regarding health and diet will be answered. Large stamped self-addressed envelope must be enclosed. Write no more than 100 words. Address: McCoy Health Service, The McCoy Building, 1551 West 4th Street, Los Angeles, Calif.

WHEAT GOES TO YUGOSLAVIA—Wheat is being loaded on the Yugoslav merchant marine SS. Prince Andrej, which is preparing this week for a 24-day journey back to Yugoslavia on its first trip since that country was invaded six years ago. Under the UNRRA plan, 62,380 bags of United Nations wheat go to Yugoslavia. The cargo includes plows, trucks, canned meat.

By Prices Board Demobilized Vets Warned Of Dangers of Inflation

TORONTO, Aug. 10.—(CP)—The men were interested in the depth of foam on beer and the length of tails on shirts but more than anything else they were interested in housing and in getting themselves established in business.

Their military careers were ending. They had fought at Falaise and Pontecorvo, in the North and the valley of the Rhine. Now they had arrived at a demobilization camp and were being told that they were to be sent to a period of short supply of a duration greater than that of the war they have won.

Some of the men do. They are tired of lectures, advice, words. Some of them walk out. But most of them ask questions or listen to those who do.

Where can I get a house? Can I land a job? Does a tenant... Questions on housing and money, questions of priorities in the vital categories pour out meeting the meeting.

Prices Board spokesmen say they have received co-operation and thanks from military authorities in putting their talks over. Their chief worry is that they are not reaching enough of the men.

Prices Board spokesmen say they have received co-operation and thanks from military authorities in putting their talks over. Their chief worry is that they are not reaching enough of the men.

Catholic Paper Condemns Bomb

LONDON, Aug. 10.—(CP)—The Catholic Herald in a front-page editorial yesterday said use of the atomic bomb "is not only utterly and absolutely indefensible in itself but the reaching of this appalling goal, light up for us the moral abyss into which the path we have all been treading."

Asserting that the path we have all been treading, the Herald said "it would have been better for all of us if we had courageously stood by him in witness to moral truth who had world has disappeared to the very verge of the catastrophe which now inevitably threatens all civilization."

"Not by merely attempting to inactivate or control this weapon, but by repudiating all warfare and destroying its weapons can safety now be sought," the paper concluded.

The Bulletin's SPORTS SHOW by Hal Dean

SHUTTING OUT U.S. Signals—At Renfrew Park Thursday night, Hal Stafford gave Arrows playoff chances a real boost, made it tougher for Dodgers to reach the select circle and created a situation whereby Signallers could be squeezed out of the post season series.

Signals with a one-game advantage still have two left to play, the same as Arrows, while Dodgers with five league victories remaining—three with Yanks and a signal—with a one-game lead and a half from the third-place Arrows.

Dodgers now have to win four out of five games to reach the first round of the playoffs, while Arrows need only two wins to reach the select circle. Should Signallers lose to the Yanks and Dodgers win four, a three-way tie for second place would be the result.

TWO BIG PURSES—A TOTAL of \$48,100 will be in play in purses for the 13-day race meeting which opens at the Edmonton Exhibition grounds on Saturday afternoon at 2:30 o'clock.

No purse will be less than \$500 and the minimum for the feature event each day during the week will be \$500, with \$1,000 offered for the Continental Handicap on Saturday, August 18, and a similar amount for the Au Revoir Handicap on Saturday, August 25.

Six of the feature races will be a distance of over a mile, with the Endurance Handicap which is held for Friday, August 24, the longest of the meet—about a mile and five-eighths.

HERE AND THERE—JIM JUNKER, who singled in the fourth inning and then stole second was the first Signaller to score.

2-2 in 11 Innings Clippers, Flyers Tie Again In Northern Fastball Final

Stagnated after four games in what was to have been a best of three series, U.S. Army Clippers and the RCAF Flyers will have to play a fifth game to decide the northern Alberta senior men's fastball championship.

Last night the two clubs battled to a 12-inning 2-2 deadlock for their second tie game of the series. As each team has won a game, the series will continue at 7 o'clock this afternoon at Kingsway Park when officials hope a winner, who will take on the southern champions on the provincial title, will be declared.

Played before the largest crowd of the season, the teams battled tooth and nail with tension high until the final out.

The Flyers opened the scoring in the first frame, but McGee worked his way around the base paths on a base on balls, a wild pitch and a couple of errors. In the sixth stanza, the Clippers came back with a tie to deadlock the game with Dick Tripp getting a life on a fielder's choice. Tripp's

Arrows Improve Playoff Chances — One Game From 2nd-Place Tie

Stafford Banks Signals 5-0 on 4-Hitter

Only Pair Of Losers See Third

HAL STAFFORD held U.S. Signals to four scattered blows as the Arrows scattered a 5-0 shutout in Thursday night's Senior Baseball League game at Renfrew Park. Only two Signallers reached third base.

In marking up his initial shutout of the year, the Arrow right-hander gave his club a 5-0 victory in the fourth, sixth, eighth and ninth frames. Jim Junker, second baseman, was the only Signaller to get a hit, and he was issued only two walks and struck out six.

Excepting for the fourth heat when the Arrows got to him for a time of scattered good for two runs, and in the eighth when two hits, a walk and an error netted two runs, the Arrows pitched straight ball. Two misplays, one by the pitcher himself and the other at second ahead of a single, resulted in a run in the sixth.

The loss cut a single game the margin held by the second-place Signallers and the Arrows are now at second ahead of a single, resulting in a run in the sixth.

C.S. Tennis Meet

Bessie McAvoy, Betty Hall Cop Ladies' Doubles Crown

Bessie McAvoy and Betty Hall won the ladies' open doubles title in the Civil Service Tennis Club tournament last night by defeating Sophie Mighall and Edna Kenwood 6-3, 6-4, in the final round.

The match featured some good tennis with McAvoy playing an unusual back court raving on her accurate drives while Hall waited at the net for chances to put away her opponents' returns. Mighall and Kenwood both produced good opposition.

In a mixed doubles semi-final Bessie McAvoy and George Schmidt defeated Sophie Mighall and George Mighall 6-1 and 10-8. This match featured the high powered play of Schmidt at the net where he was practically unbeat-able, dashing from one side to the other.

Scheduled for today is the men's doubles final, George Schmidt and Bill Haines battling it out with George Mighall and Capt. Ray Gould. The last time these four met was in a Vancouver Cup match which went five sets and was won by Schmidt and Haines.

A ladies' singles semi-final is drawn between Betty Hall and Sophie Mighall and should produce some good tennis.

South Side Plays

EAC Nine Tonight

Edmonton Athletic Club has a chance to move to within a half game of the second-place Arrows and a berth in the playoffs to-night when they meet South Side in an Edmonton Junior Baseball League fixture at Clarke Stadium, starting at 7 o'clock.

THURSDAY'S RESULTS
 L.O.D. Final—McAvoy-Hall def. Mighall-Kenwood 6-3, 6-4.
 M.S.S.D. Semi-final—McAvoy-Schmidt def. Mighall-Ducherry 6-1, 10-8.
 M.S.S.—Stu Harris def. M. Watt 10-7, 6-6.
 L.R.D. Britton-Care def. Ducherry-Forbes 4-6, 6-3.
 M.S.S.D.—Graham-Freestone def. Mather-Warren 6-1, 6-1.
 C.A.R.—Carr-Bruce def. Mighall-Ducherry 6-1, 6-2.
 Forbes-Armstrong def. Gould-Jackson 4-6, 6-3, 6-3.

FRIDAY'S SCHEDULE
 6 p.m. M.O.D. Final—Ducherry-Gould vs. Schmidt-Haines.
 8:30 p.m. L.O.S. Semi-final—Betty Hall vs. Sophie Mighall.
 L.R.D.—Saker-Gould vs. Britton-Care.
 7:30 p.m. M.S.S.—A. McNaughton vs. Harris.
 M.S.S.D.—Hughes-Hall vs. Carr-Bruce.
 8 p.m. M.S.S.—Saker-Johnson vs. Forbes-Armstrong.

York Slams Two Homers As Tigers Trounce Red Sox

DETROIT, Aug. 10.—(AP)—Rudy York sparked a 15-hit Detroit attack with a pair of two-run homers as the Tigers walloped Boston Red Sox 11-5 Thursday to maintain their one-game American League lead over Washington.

The Senators won 7-2 from Chicago.

Detroit overcame a 3-2 Boston lead by chasing starter Emmett O'Neill with a four-run assault in the third and came right back to score four more runs off relief pitcher Cirm Hausman in the fourth.

Position Explained

British Columbia's Attitude On Surrender of Tax Rights Holds Conference Spotlight

By CHESTER BLOOM

Edmonton Bulletin Ottawa Bureau

OTTAWA, Aug. 10.—British Columbia's reluctant attitude toward the federal government proposals to take over all the income, corporation tax, and succession duties in lieu of increased Dominion payments to the provinces and highly enlarged federal security responsibilities occupies a prominent place in the large part of the debates in the sub-committee all day Thursday at the Dominion-Provincial conference.

Meetings of the sub-committee on finance and taxation, public investment, labor, constitution and agriculture were held morning and afternoon until a late hour.

The British Columbia reluctance arises from the fact that when the wartime tax arrangement whereby the Dominion took over the three direct taxes was entered into, British Columbia revenue from its 10 per cent income tax and corporate taxes was at a peak. This was because the three chief extractive industries—logging, fishing and mining, were then booming under wartime demands.

WARTIME PAYMENTS

The wartime payments to the provinces by the Dominion in lieu of the three direct taxes, were based on a proportion of the revenue received by the provinces at the time of transfer. As a result, British Columbia claims that the proposed federal minimum payments based on the 52 per cent capital income and population calculation of 1941 would produce only nine million dollars for British Columbia against a revenue of fifteen million dollars if the province levied the direct taxes itself. In other words British Columbia claims that it would lose \$6 million dollars worse off, whereas the province proposes including Manitoba would be much better off.

The argument against the British Columbia position is that the \$12 per cent of population and income would be a future irrevocable minimum whereas there is no guarantee that the revenue from the extractive industries would continue on the same level. Nevertheless, Ontario, which paid a pre-war income tax of only three per cent compared to the B.C. ten per cent tax, nevertheless seemed inclined to support the B.C. position.

What this amounts to, of course, is an effort by these provinces to press for a higher minimum base rate of Dominion payments to the provinces than the \$12 per capita offer.

ANOTHER FEATURE

Another feature of the Dominion proposals which perplexes some of the provinces is the somewhat inflexible nature of such a base of payments. For example, while the payments to the provinces would increase at a rate linked to proportionate increases of population and gross production (total income), there is no assurance that provincial expenditures might not increase after the war at an even more rapid rate.

This problem applies to all provinces, but particularly to the prairies where the provincial capital commitments for buildings for mental health purposes and other like health capital expenditures detained during the war period might greatly increase the provincial debt loads after the war.

While the federal government in its case proposes to assume 75 per cent of these costs, the necessary capital expenditures entered by the proposed grand coalition of such health services by the government might create a debt load on the provinces that would cause trouble in four or five more years.

POSSIBLE SOLUTION

The solution seems to be to devote some field of provincial taxation outside of the direct taxes taken over by the federal government to guard against such expenditures. On the other hand, the federal assumption of the huge revenues assumed from the income and corporation taxes and succession duties would enable the Dominion to eliminate or at least cut in half, after the excessive war expenditures cease, the present onerous eight per cent sales tax which is such a burden on the people and industry of the whole Dominion.

Unquestionably, one of the moves of the Dominion government, too, if it were assured of all the revenues from income and corporation taxes and succession duties would be toward reduction of the present high tariffs which are such a burden on both trade and industrial expansion.

These last considerations indicate the complicated nature of the problems now being threshed out by the six provinces. Late this year or early next year, the whole conference will meet in Ottawa to discuss the results and try to arrive at a unanimous agreement.

Churchill Policy

THE PAS. Man. Aug. 10.—(CP)—Policy of the Dominion government in the matter of Churchill, in the matter of Churchill, to facilitate the use of the northern Manitoba port in every way possible, Transport Minister Clegg said in a telegram received here yesterday.

The present high tariffs which are such a burden on both trade and industrial expansion, these last considerations indicate the complicated nature of the problems now being threshed out by the six provinces. Late this year or early next year, the whole conference will meet in Ottawa to discuss the results and try to arrive at a unanimous agreement.

WHERE ATOMIC BOMBS ARE MADE — This modest plant at Eldorado, Great Bear Lake, Northwest Territories, produces the world's largest supplies of uranium, now used for warlike purposes in the atomic bomb. Pictoblend mine here produces the fabulous ore.

Atomic bombs are made in this plant at Oak Ridge, near Knoxville, Tenn. Note that the buildings have few windows, except in the top story. Canada supplies much of the uranium used.

"Each recruit gets a railway warrant at Lachine and when he gets it, he is supplied with a free form which he telegraphs his expected arrival," the minister explained. "The minister will expect the sending of these telegrams, it would be impractical for the police to undertake the forwarding of the information without the co-operation of the individual, because many of the lads have a detour or stop-over on their way home."

In some cases, particularly among decorated airmen, specific requests have been made that no mention of arrival time be sent, so anxious are some to avoid formal recptions.

Vatican Statement On Atomic Bombs

ROME, Aug. 10.—(AP)—Pope Pius was quoted yesterday as saying that anyone had been authorized to express the Vatican view of the atomic bomb against Japan.

Newbold News, Jr., correspondent of the Washington Star, said that during a private audience the Pope granted him and Carlton Haidt, a correspondent of the New York Times, yesterday they showed the Pontiff an Associated Press dispatch published in the army newspaper Stars and Stripes which said the Vatican opposed the use of atomic bombs on Japan.

Corys said the Pope declared he had not been aware of any such statement.

Domination Status Urged For India

PRETORIA, South Africa, Aug. 10.—(Reuters)—Field Marshal Jan Christiaan Smuts, premier of South Africa, yesterday said India should be granted Dominion status and not Dominion status.

He said it was a "near Indian" but not an "Indian" as such, and that India should be a free, independent, happy country. He said it was a "near Indian" but not an "Indian" as such, and that India should be a free, independent, happy country.

He said it was a "near Indian" but not an "Indian" as such, and that India should be a free, independent, happy country. He said it was a "near Indian" but not an "Indian" as such, and that India should be a free, independent, happy country.

Calculation Made Before War

Force of Gravitation Believed Exceeded One Million Times by Power of Atoms

By HOWARD BLAKESLEE

NEW YORK, Aug. 10.—(AP)—One million times greater than the force of gravitation is the calculated force of the atomic bomb.

The bombs dropped on Japan presumably tapped in a small degree. Gravitation is the force which holds the known to science, unless the atomic one is bigger.

The calculation of a million-fold gravitation was made before the war by Dr. Gregory Breit of the University of Wisconsin. This figure was based partly on the discovery at the Carnegie Institution of Washington of an apparently new force of attraction, which exists only, so far as known, in the center of atoms.

Gravitation's force reaches out over a vast space. The terrific atomic force appears to be only wholly confined within the nucleus, or heart, of the atom.

BOX SCIENTISTS TAPPED That nucleus is the box scientists tapped with the uranium atoms forming the atomic bomb. It is difficult enough for laymen to imagine the exceedingly small size of an atom. But this atomic force exists in an even incredibly smaller space.

A uranium atom's diameter is calculated to be a third to a half of a millionth of an inch. But the nucleus is confined to a space estimated at 100,000 times smaller. The space between this center and the uranium's circumference is filled with 92 electrons circling around.

Now comes the almost fantastic calculation. The force of gravitation is calculated to be a third to a half of a millionth of an inch. But the nucleus is confined to a space estimated at 100,000 times smaller. The space between this center and the uranium's circumference is filled with 92 electrons circling around.

Now comes the almost fantastic calculation. The force of gravitation is calculated to be a third to a half of a millionth of an inch. But the nucleus is confined to a space estimated at 100,000 times smaller. The space between this center and the uranium's circumference is filled with 92 electrons circling around.

part of the picture, which nevertheless is well verified in the physics books.

This centre that is 100,000 times smaller contains 90 per cent of the entire mass of a uranium atom. The same fact is true of all the other atoms of the known universe. Their tightly-packed nuclei contain 90 per cent of their masses.

In other words, 99 per cent of the solid substance of all things is packed into these atomic nuclei.

That is why scientists sometimes refer to the atomic energy as the force which binds the universe. When speaking on the size of a jump that could annihilate New York City, it is just as logical to say one man, exploding atomically, could do that. The statement is quite true.

and all creatures, including man, are packed into these atomic nuclei.

The ROAD AHEAD

by Capt. HARPER PROWSE, M.L.A.

ALL the people who are irked by the lack of shipping playing between Canada and England probably the most concerned of all are those servicemen who still have wives on the other side of the Atlantic. Combined with the happy prospect of having to live apart is the additional problem of financial arrangements for their support.

In spite of all efforts made in the services to discourage men from marrying overseas, about 40,000 of our servicemen married British girls and many of them have families. While this situation certainly made their lives in England much happier many there are now becoming more unhappy every day.

To date nearly 15,000 wives and children of servicemen have been separated from their Canadian relatives for so long. They believe that those who married in the United Kingdom have not been separated from their families for very long and a few months won't work any terrible hardship on them.

As long as the men remain in the services the problem is merely one of loneliness. The man's personal allotment and the government allowances are paid directly to the wife. But the moment a man is discharged from the service his pay and allowances are discontinued.

Storage Garage Damaged by Fire

Fire of unknown origin at 8 a.m. Friday caused slight damage to the premises of Nicholas Bros. storage garage, 118 avenue and 95 street. Damaged by fire were some of the tires in the basement and a quantity of oil.

No one was injured. The blaze was extinguished by two firetrucks from No. 5 fire hall. Fire was caused by a short circuit in the wiring.

The fire was said to have broken out before the arrival of the employees.

The garage is owned by Art Chapman of Edmonton, and rented by Walter Nichols. Police said a recovered automobile, used as a 12-passenger school bus, was blistered by heat and damaged seats.

The damage was said to have been covered by insurance.

Alberta Bonds Back on Market Officials State

Alberta bonds now are back on the market and are selling for as much as 120 on certain issues, according to officials of local bond markets.

Baron trading "Albertas" was lifted Tuesday, but most holders are apparently are keeping their bonds for exchange and cash surrender values offered in the refunding plan recently approved by the Legislature.

Provincial bonds went off the market May 18 and at that time were drawing very favorable prices. Trading was halted by Hon. J. L. Hiley, Dominion Finance Minister, who offered a 100 per cent tax on speculative profits on Alberta bonds as from Feb. 1, 1915.

EXPORT STOPPED

At the same time the export of Alberta securities to the United States was prohibited. Nothing could be done to halt trading in the United States, but the orders had the effect of halting export to the U.S. to avoid the 100 per cent tax.

Both measures resulted in trading being stalled on the bonds and they were not quoted on bond markets between May and Aug. 7.

Lifting the restrictions has resulted in a large bond market, dealers state. It is believed most holders are depositing their bonds for refunding. A report from Montreal Wednesday stated demands for Alberta bonds were heavy but no sales were forthcoming.

PRICES IN LINE

Market price of the bonds, between 100 and 120, is apparently in line with the value of the securities. A \$1000 bond might have as much as \$200 in back interest to be paid under the refunding plan.

This back interest is subject to income tax, and depending on a holder's tax bracket may be as much as two-thirds of this interest may be taxed back. On the other hand, if the bond is sold outright for \$1200, the total amount would not be taxed.

The refunding plan will go into effect when 75 per cent of outstanding bonds has been deposited for conversion. This offer is good until Sept. 1, and as long thereafter as the government orders. Dec. 1 has been suggested as a final "cut-off" date.

U.S. Is Interested In Northern Field

That the United States government is keenly interested in developments at Yellowknife and in other parts of the Canadian northwest is indicated by the fact that Dr. John Gruber, field representative of the U.S. department of the interior is making a flight to Yellowknife Saturday.

Dr. Gruber plans to remain three or four days at Yellowknife looking over the mining area.

On her return to Edmonton she will make a trip over the Alaska Highway.

Commerce Chamber Protests Delay In Opening Northern Air Route

Aviation committee of the Edmonton Chamber of Commerce has telegraphed Hon. C. D. Wagner and other leading Dominion officials concerning delay about opening operations of the Whitehorse-Fairbanks air route by a Canadian company.

The committee points out that it is several months since Charles Bueger, representing the Chamber of Commerce and Northwest Air Conference, expressed the interest of Mr. Howe and officials of Trans-Canada Air Lines about operation of the route by a Canadian company.

Further to these discussions TCA and CNA the latter a Canadian operator on behalf of TCA, came to agreement on operations and the Canadian Air Transport Board for long application, agreed.

SUBMIT BRIEF

A brief was then submitted to the Civil Aeronautics Board of the United States and on July 22, 1915 TCA and CNA were both heard. Certain interventions were made by others including the local representatives of the public and the United States. It was understood here that the CNA had offered TCA a temporary license to fly the Whitehorse-Fairbanks route with CNA as a sub-contractor.

Since that time the chamber has advised that CNA pilots and equipment have completed the familiarization flights required and have been waiting the go-ahead signal from the CNA.

The aviation committee of the United States has been pressing for the development of this route. The committee has been pressing for the development of this route. The committee has been pressing for the development of this route.

ARRIVES IN CITY - Wing Commander Eric T. M. Duggan, who returned to Canada a short while ago after almost three years overseas with the RCAF, arrived in Edmonton by plane Tuesday night. He was chief administrative officer supervising administration of four training schools in England. Prominent in rugby and hockey circles in Canada, he enlisted in 1914 and before arriving in 1915 he was at the "wicket" school in Winnipeg. He is a son of Mrs. D. M. Duggan of this city and the late Mr. Duggan and his wife is the former Eric Davidson, daughter of Group Captain C. A. Davidson, RCAF, and Mrs. Davidson of this city.

LANCASTER PAYS Brief Visit Here

In a preliminary visit to Edmonton Thursday, Gen. Sir Alexander MacKenzie, 4th Baronet, Lancaster, a former member of the 48th (London) Division, arrived in Edmonton by plane Tuesday night. He was chief administrative officer supervising administration of four training schools in England. Prominent in rugby and hockey circles in Canada, he enlisted in 1914 and before arriving in 1915 he was at the "wicket" school in Winnipeg. He is a son of Mrs. D. M. Duggan of this city and the late Mr. Duggan and his wife is the former Eric Davidson, daughter of Group Captain C. A. Davidson, RCAF, and Mrs. Davidson of this city.

BELIEVES IN ROUTE

The aviation committee of the Edmonton Chamber of Commerce believes in the prompt establishment of this northern transportation and will press for classification of the route.

The inland Southern Air Route has proven faster, more economical and a better service to Alaska than any other in Western States.

The route is still not being operated as a number of questions have been asked in the House of Commons. The route is still not being operated as a number of questions have been asked in the House of Commons.

THE INQUIRING Reporter

THE QUESTION

Now the Japanese threaten to use an atomic force weapon. Do you think they really have one?

THE ANSWERS

W. B. PATTERSON, railway express clerk: There's a possibility the Japs may come up with some such weapon before the Pacific war ends, but it seems very remote to me. If they had such a weapon, they would use it early to "catch" the full "shift" on duty. One officer described the situation at 7:30 a.m.

"There was quite a stir and nearly all the officers on duty crowded around the news ticker to read the story. For a time it was as if there might be a spontaneous celebration but then we got the announcement from Washington stating that the "we would continue to fight until we received an official offer of surrender."

"The feeling then was that we couldn't wait out a while longer. When the official news of surrender comes there'll be a celebration at the U.S. air base which has not been seen to date," the officer said.

HOCKING, student: I think the Japs are bluffing the bluff of a desperate nation. Japanese scientists have always been behind the rest of the world in outstanding research.

McMILLAN, mechanic: There's a chance that the Japs may have been handed the results of German research in atomic power before the collapse of Germany may have been in complete the work since that time. The Allies should be prepared for such a happening and hence the Japs are homeland so hard they will not get an opportunity to use new weapons they may have.

ROAD REPORTS

Light rain and roads great at Athabasca, muddy at Slave Lake OK at High Prairie, Peace River, Fairview, Grand Prairie, Dawson Creek and Fort St. John. MAN IS INJURED

Removed to the Royal Alexandra hospital by Smith's ambulance early Friday, Nick Wynnebach, Edmonton construction worker, was receiving treatment for a back injury. He is believed to have fallen through a roof at the Albert Auto Body Company, civic garage, dropping about 15 feet to the floor below.

Car Missing

Theft of his 1928 sedan from 101 street and 102 avenue around 9 p.m. Thursday was reported to city police by Dan Jarema, 10407 35th. The green car has a black fabric top, said to be in poor condition, and has Alberta license 31239.

60% Linen Crash
